EDUCATION

National Institute of Technology (NIT), Hamirpur	<i>Dec 2021 – Jun 2026</i>
Integrated Degree (B.Tech + M.Tech) - <i>Computer Science and Engineering</i>	<i>CGPI : 8.73</i>
<i>Course Work : Data Structure and Algorithms, OOP, Software Engineering, Computer Networks, DBMS, Operating System</i>	

EXPERIENCE

Samsung Electronics	<i>Noida, Uttar Pradesh</i>
<i>SWE Intern</i>	<i>Jan 2026 – Jun 2026</i>
- Developed an ML-powered Android travel companion spanning 3 integrated application modules for real-time travel assistance. - Built sensor data processing and preprocessing pipelines, achieving 98% transportation mode detection accuracy. - Optimized on-device inference using TensorFlow Lite, reducing mobile deployment overhead by 75%. - Collaborated with developers through Git-based code reviews and iterative feature development while implementing backend services using Node.js, Express.js, and Firebase Firestore (NoSQL), designing 10+ REST APIs. - Validated backend APIs through unit and functional testing while collaborating in Agile sprint cycles to deliver reliable features across 3 application modules. - Utilized logging, debugging, and monitoring techniques to troubleshoot Node.js and Express.js backend services, resolving 20+ runtime and API issues while ensuring reliable application functionality.	
Accenture	<i>Chennai, Tamil Nadu</i>
<i>Advanced App Engineering Analyst Intern</i>	<i>May 2025 – Jul 2025</i>
- Executed ETL workflows across 3 banking datasets involving extraction, transformation, cleaning, and KPI analysis. - Produced 5+ interactive Power BI dashboards and reports, improving visibility into critical banking KPIs. - Streamlined business workflows using Power Automate, reducing processing time by 30%.	

PROJECTS

Meeting Summarizer Python, PyTorch, Hugging Face Transformers, LED, SpaCy, Scikit-learn	Project Link
- Proposed an abstractive meeting summarization framework using transformer-based long-context models. - Fine-tuned the Longformer Encoder-Decoder (LED) on the 100-hour AMI corpus using PyTorch and Hugging Face Transformers. - Enhanced semantic representations with SpaCy Named Entity Recognition (NER) and Latent Semantic Analysis (LSA), improving ROUGE-1 by 4.07 and ROUGE-2 by 1.83. - Leveraged sparse-attention mechanisms to improve ROUGE-L by 2.43. Publication: Presented at <i>7th International Conference on Frontiers in Computing and Systems - COMSYS</i>, 2026.	
SynapseAI-AI Agent Platform Python, FastAPI, LangGraph, PostgreSQL, OpenAI, Docker	Project Link
- Built an AI Agent platform for intelligent task management and multi-agent orchestration. - Engineered a FastAPI + LangGraph backend with 18 REST APIs, JWT authentication, model orchestration, Retrieval-Augmented Generation (RAG), and semantic search. - Architected relational data models using PostgreSQL, pgvector, Pinecone, and mem0 to process 1000+ AI tasks with 95%+ recommendation accuracy. - Delivered dual frontends using Next.js 16 and React 19, integrating Server-Sent Events and Prometheus monitoring.	

TECHNICAL SKILLS

Languages	Python, C, C++, JavaScript, Java, SQL, HTML, CSS
Backend & Web	FastAPI, Node.js, Express.js, REST APIs, React.js, Firebase Firestore
Databases	PostgreSQL, MySQL, NoSQL, SQLite, pgvector
Cloud & DevOps	AWS , Docker, Kubernetes, CI/CD
Distributed Systems	Microservices, Distributed Systems, Event-Driven Architecture, Apache Kafka
AI & Generative AI	Machine Learning, Deep Learning, Large Language Models (LLMs), Prompt Engineering, Context Engineering, Retrieval-Augmented Generation (RAG), AI Agents, Embeddings
Data & Analysis	Pandas, NumPy, Scikit-learn, Power BI, Matplotlib
Tools	Git, GitHub, Postman, VS Code, Android Studio, Linux, Google Colab, Kaggle

ACHIEVEMENTS

- Qualified GATE 2024** in Computer Science and Engineering, securing a score of **537**.
- Solved **500+** problems across LeetCode, demonstrating strong proficiency in Data Structures and Algorithms.
